

BOOSTER SEATS

Keeping your child safe.

**Until they're
8 years old
or 4'9"**
children MUST
use a booster seat.

IT'S THE LAW

Michigan law requires children younger than age 8 and shorter than 4 feet 9 inches to be properly buckled in a child safety seat or booster seat while riding in a motor vehicle.

Which booster seat should I use?

A no-back booster is recommended for vehicle seats with a head rest, and a high-back booster for vehicle seats without a head rest.

How should I install the booster seat?

Booster seats must be used with both a lap and shoulder belt, NEVER with a lap belt only.

Always read the instructions that come with the booster seat.

Important: All booster seats are safest when used in the back seat.
